Business Beats Cancer Guernsey

Together we are beating cancer

CANCER RESEARCH UK
BUSINESS BEATS CANCER

The Guernsey Cancer Landscape

The NICE drugs gap narrowing but not closed.

No routine access to UK Cancer Drugs Fund treatments.

No routine access to new drugs within clinical trials.

No financial support for travelling to participate in clinical trials.

An unmet need for local patients.

A lack of tools for our oncologists.

CANCER RESEARCH UK

The Cancer Research Landscape

1 in 2 of us will be affected by cancer in our lifetimes.

Cancer Research UK has projected a £2 billion funding gap in cancer research over the next ten years.

Cancer Research UK is the largest funder of cancer research globally.

Now is the time...

Why Cancer Research UK?

"Money goes off-island!"

- Large scale research cannot be done on island.
- Cancer Research UK funds a Cancer Immunology Centre (CIC) in Southampton.
- The CIC's Clinical Trials Unit has core funding from Cancer Research UK.
- Cancer Research UK's research aims to benefit every local cancer patient by funding research into prevention, diagnosis, and treatment.

Our Fundraising Model

- We have raised over £500,000 to date and are now aiming for £1million.
- Approx. 90% of funds raised go to the Southampton Clinical Trials Unit via CRUK.
- Remainder is retained locally to fund local initiatives via the Guernsey Society for Cancer Relief.
- Local funds allow Guernsey patients to participate in clinical research.
- Local funds facilitate supporting costs for access to clinical trials.
- Research benefits every local cancer patient indirectly.

Achievements To Date

Connecting Guernsey Patients to Clinical Research in Cancer

- Contributed to vital research being conducted at Southampton Centre for Cancer Immunology.
- Regulatory/ethical hurdles cleared to allow Guernsey patients to join clinical trials.
- Pool of funding retained locally to facilitate travel costs & accommodation provided by the States.
- Guernsey patients' samples collected locally and used in research into prognosis and progression of Lymphoma.
- Seeking approval for more Guernsey patient samples to be collected locally in future.

We are looking for volunteers to join the Board for the next fundraising campaign
